CALL for PAPERS of SPECIAL ISSUE

PRODUCTIVITY for LOGISTICS

It is crucial to carry out logistics operations with productivity focus in the fast-paced world of logistics. Logistics providers that optimize workflows, leverage technology, and streamline operations may ensure on-time delivery, reduce resource waste, and gain an advantage in an increasingly competitive market. The following productivity-related topics will be among those covered in the special issue with the theme "Productivity for Logistics":

- **Innovative Technologies in Logistics**
 - Logistics 4.0
 - Data-driven Decision Making in Logistics
 - Artificial Intelligence in Logistics
 - Technology Integration in Logistics
- **Green Logistics**
- **Transportation Management / Distribution Planning**
- **Lean Logistics**
- **Maritime Logistics**
- **Air Logistics**
- **Sourcing Decisions in Logistics**
- **E-commerce Logistics**
- **Warehouse Management**
